

QUALITY POLICY STATEMENT

24TH March 2016

The management of Thomas Brown Engineering Ltd are dedicated to providing their customers with products and service which conform in all respects to their expectations and to the requirements of the AS9100 quality management standard. The company is committed to compliance with requirements and appropriate legislation.

This policy, together with all other components of the Quality Management System are mandatory and will be observed by all who act, in whatever capacity, on behalf of the company. No deviation from prescribed procedures will be allowed without the express permission of the Quality Representative.

The management team accept responsibility for communicating to all employees, the Company's commitment to quality and for ensuring that the Quality Policy is implemented, understood at all levels, and maintained. All members of staff are encouraged and motivated to be conscious of the contribution which they make towards the achievement of Quality Objectives, which are established and reviewed during regular Management Review meetings. Quality Objectives and Key Performance Indicators are determined to help monitor and continually improve product quality, and service.

Given the progressive nature of Quality Assurance, the management undertakes to continually improve the effectiveness of the Quality Management System. Everybody employed by Thomas Brown Engineering Ltd is recognised as a valued contributor to the continued success of the company, not least through achievement of the highest quality standards.

The scope of the QMS is: Sub-contract precision machined parts, prototyping, batch production and minor assemblies to the aerospace, oil and gas, power generation and food and drinks industries.

The company has appointed a Quality Representative who has authority and responsibility for the implementation and maintenance of the Quality Management System.

Mr G.T.M. Brown
Managing Director
